

As a leading university hospital with a rich tradition, the Insel-spital is part of the Insel Group and is a centre of medical expertise and high technology with an international reputation as well as being a first-class training and research centre.

Department of Neurology
Centre for Movement Disorders

examined immediately or upon agreement

Senior Consultant/Head of Centre For Movement Disorders

100 %

The Department of Neurology is one of Insel Gruppe's core departments. We offer a comprehensive treatment portfolio ranging from primary care through to state-of-the-art medicine, including neurorehabilitation. Clinically and scientifically our department has a broad international visibility. The centre for movement disorders with its specialty deep brain stimulation is one of the largest in Switzerland.

Your challenge

The successful applicant leads the Centre for Movement Disorders with its subspecialties for outpatients and inpatients, including deep brain stimulation, botulinum toxin, and neurogenetics using interprofessional and interdisciplinary approaches. He/she will further develop the clinical portfolio based on the needs of patients and referring physicians. The head of the centre will optimize internal processes and advance the clinical and scientific strategy. The centre's team currently consists of 2.5 deputy consultants, 2 fellows, specialist nurses, as well as technical and administrative staff. You are expected to work in close cooperation with other departments and centres and with clinical/basic research groups.

Your profile

You are a Consultant in Neurology with a Habilitation qualification (or equivalent) and broad clinical experience. You are specialised in the field of movement disorders/neurodegenerative diseases, both clinically and scientifically (e.g. with translational or biotechnological approaches). You will apply your outstanding communication and networking skills to represent the centre internally and externally. You also display organisational talent, assertiveness, basic business management knowledge, and leadership experience in a comparable role. Good knowledge of IT and languages (German, English, preferably also French/Italian) are an asset.

Our offer

We can offer you an exceptional and attractive management position with the possibility of playing a decisive role in the development of the Centre for Movement Disorders.
